

Add a WooCommerce Sale Category

An easy way to have a page showing products on sale in your WooCommerce store is to add this shortcode to a page:

[Copy](#)

```
[[sale_products]]
```

Here's an example:

The screenshot shows the WordPress editor interface. At the top, there's a toolbar with buttons for 'Edit Page' (highlighted in blue), 'Add New', and other options. Below the toolbar, the page title 'Products on Sale' is displayed. Underneath the title, there are buttons for 'Permalink' (with the URL <https://pdfreports.com/sale/>), 'Edit', 'TAGDIV COMPOSER', 'Add Media', and 'Add Contact Form'. The main content area contains the shortcode `[[sale_products]]`, which is highlighted with a red arrow pointing to it from the bottom right.

It's not a store category but it does the same thing. You can just link to that page in the navigation or from wherever you like.

There is a plugin here:

[WooCommerce Sale Category \(guthub.com\)](#)

You'll have to download the files, then upload them (via FTP or SSH) to your WordPress plugins folder (in `/wp-content/plugins/`) to get it to show up as a plugin inside WordPress.
