

# Get More Traffic to Your WordPress Site With One, Quick Change

If you use WordPress and publish new posts on your website, then there's one thing you can do to start getting a lot more traffic to your website instantly.

It's going with a better ping list!

## Improve Your WordPress Ping List

In your settings, go to: Settings > Writing and then scroll down where it says Update Services.

If it looks like this, then it's time to amp that up:

### Update Services

When you publish a new post, WordPress automatically notifies the following site update services. For more about this [Services](#) on the Codex. Separate multiple service URLs with line breaks.

```
http://rpc.pingomatic.com/
```

Instead of just one entry there, you can add a lot more.

What this does is what it says... it notifies "ping" services when you publish a post. So why just notify one when there are a lot more out there? When you add more, you'll get more spiders coming to your website to check out your great, new content.

Open up the file I use, which has **185 entries** in it: [update-services-ping-list.txt](#)

(or you can copy it below)

Copy what is in that file and then paste it in and click "Save Changes" at the bottom. My list does include the "rpc.pingomatic.com" URL, so you can safely remove that default entry and paste in my list.

And... that's it. Start writing more content!

Here's the list from the file:

Copy
